

Worker Entry - User Manual

This application is used to submit worker entry requests, manage worker and contractor master data, and process pass approvals.

1. User roles and preparation

- Request users create worker entry requests and monitor their status.
- Approving users review pending requests and approve or reject selected workers.
- Administrators maintain worker, contractor, and officer master data.
- Before submitting, keep the worker's full name, mobile number, government ID, address, purpose, entry time, contractor, and approving officer details ready.

2. Submit a worker entry request

1. Open **Worker Entry** from Application Dashboard.
2. Open **Worker Entry Request**.
3. Select or enter the location and contractor. Existing master data appears as suggestions.
4. Add each worker and enter the full name, mobile number, ID proof number, and address carefully.
5. Enter the work purpose and requested entry time. Use a clear, specific purpose.
6. Select the approving officer and verify the displayed officer details.
7. Review every worker in the request before submitting.
8. Submit the request and wait for confirmation. Avoid submitting the same request repeatedly while it is processing.
9. Use the forwarding option when the request must be sent to another approving officer, if available.

5. Master data

Worker Master Data stores reusable worker details. **Contractor Master Data** stores contractor details. Authorized administrators should add, correct, or remove outdated entries so request forms provide accurate suggestions. It will help not to type repeated contractor and workers details on daily basis. Before 1st time Contractor login, the same contractor should login as Normal User type and register themselves through this Contractor Master Data tool. Once registration is completed, they will be able to login as Contractor from next time onwards.
